

Savi Sethi

Full Stack Developer — React.js · Node.js · TypeScript · MySQL · REST APIs · AI/RAG

+91 7015845960 savisethi26@gmail.com github.com/026-savi linkedin.com/in/savisethi

PROFESSIONAL SUMMARY

Final-year CS student and Full Stack Developer with proven experience shipping production-grade apps using React.js, Node.js, TypeScript, and MySQL. Built 4 end-to-end projects spanning AI/RAG, inventory systems, and event platforms. Strong in REST API design, database modelling, and full-cycle feature delivery. Looking to contribute immediately as a Full Stack Developer at a high-growth tech team.

TECHNICAL SKILLS

Frontend	React.js, TypeScript, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS, Responsive Design
Backend	Node.js, Express.js, REST API Design, JWT Authentication, Multer, Input Validation
Databases	MySQL, PostgreSQL — schema design, indexing, joins, CRUD, query optimisation
AI & LLM	RAG (Retrieval-Augmented Generation), Vector Search, Semantic Similarity, Prompt Engineering
DevOps & Tools	Git, GitHub, Agile/Scrum basics, Axios, Streamlit, VS Code, AWS Cloud Foundations
Security	Penetration Testing, Wireshark, Nmap, OSINT, Vulnerability Assessment
Languages	JavaScript, TypeScript, Python, Java

PROJECTS

IT Helpdesk Bot with AI

[Python](#) · [FastAPI](#) · [LangChain](#) · [ChromaDB](#) · [HuggingFace](#) · [SQLite](#) · [JavaScript](#)

2025

github.com/026-savi

- Built an AI-powered IT Helpdesk assistant using a RAG pipeline (LangChain + ChromaDB + HuggingFace embeddings) to resolve common IT queries — **automating ticket generation** for unresolved issues and eliminating manual triage.
- Developed FastAPI backend with REST APIs for chatbot communication, ticket statistics, and admin operations; integrated SQLite for persistent storage of tickets, chat history, and responses.
- Designed an interactive frontend dashboard (HTML/CSS/JS + Fetch API) with real-time chat, analytics cards, priority detection, status tracking, and an admin monitoring panel.

Inventory Management & Admin Dashboard (ISRBS)

[React.js](#) · [TypeScript](#) · [Node.js](#) · [MySQL](#)

2024

- Built a production-ready full-stack inventory platform with dynamic admin dashboard; implemented real-time CRUD operations across a structured MySQL schema managing **product, media, and user data**.
- Engineered an image upload pipeline using Multer; debugged and resolved critical API failures and file path conflicts, reducing backend error rate to near-zero through systematic root-cause analysis.
- Enforced end-to-end type safety with TypeScript across frontend and backend; REST API layer enabled seamless data flow with **zero breaking changes** across 10+ endpoints during iterative development.

Marathon Registration System

[React.js](#) · [Node.js](#) · [Express.js](#)

2024

github.com/026-savi

- Delivered a production-ready event registration platform with automated email confirmation (unique ID codes) and dynamic certificate generation — **eliminating 100% of manual processing** for organisers.
- Built responsive, accessible UI integrated with REST APIs supporting **high-concurrency registrations**; implemented real-time form validation and secure data handling to ensure zero data loss under load.

PassMaster – Password Strength Analyser

[Python](#) · [Streamlit](#) · [PostgreSQL](#)

2023

github.com/026-savi

- Developed a security tool using entropy-based analysis for password strength scoring with a secure generator and CSV export; stored and queried usage analytics across **1,000+ test entries** in PostgreSQL.

EXPERIENCE

Cybersecurity Intern · [YHills Edutech Pvt. Ltd.](#)

Jun 2025 – Aug 2025

- Conducted vulnerability assessments and penetration testing on web applications; identified and documented **8+ critical attack vectors** with structured remediation plans.
- Performed network traffic analysis using Wireshark and OSINT reconnaissance via Nmap and Sublist3r; produced security reports covering attack surface mapping and mitigation strategies.

Software Development Intern · Infosys Springboard

Jun 2024 – Jul 2024

- Developed Java-based modules as part of a 4-member team; delivered assigned features on schedule while following industry code review and version control practices.

Software Development Intern · Infosys Springboard

Jun 2023 – Jul 2023

- Completed structured software development curriculum; delivered coding assignments in Python and Java, building foundational skills in software engineering workflows.

EDUCATION

B.Tech – Computer Science Engineering

Symbiosis University of Applied Sciences, Indore

Expected May 2026

CERTIFICATIONS

- AWS Academy Cloud Foundations (2025)

IBM – AI Fundamentals

YHills – Cybersecurity (2025)

Forage – GenAI Job Simulation (2024)

NPTEL – Design, Technology & Innovation

Infosys Springboard – Python & Java (2023–24)
