

SAVI SETHI

Full Stack Developer | Java · React · Angular · Node.js · TypeScript · AWS

+91 7015845960 | savisethi26@gmail.com | github.com/026-savi | linkedin.com/in/savisethi |

PROFESSIONAL SUMMARY

Final-year Computer Science student and Full Stack Developer with hands-on experience delivering production-grade applications using React.js, Java, Node.js, TypeScript, MySQL, and REST APIs. Proficient in building scalable, maintainable, and secure software solutions across the full stack. Experienced in Agile/Scrum workflows, code review practices, and cross-functional collaboration. AWS Cloud Foundations certified with exposure to Docker and cloud-native patterns. Seeking to contribute as a Full Stack Developer (Java, React, Angular)

TECHNICAL SKILLS

Frontend: React.js (v18), React Native, Angular 17+, TypeScript, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS, Responsive Design

Backend: Java, Spring Framework, J2EE, Node.js, Express.js, FastAPI, REST API Design, JWT Authentication, Input Validation

Databases: MySQL, PostgreSQL, SQLite — schema design, indexing, joins, CRUD, query optimisation

DevOps & Tools: Git, GitHub, Gradle, Docker (familiar), Kubernetes (familiar), AWS Cloud Foundations, Agile/Scrum, VS Code

AI & LLM: RAG (Retrieval-Augmented Generation), LangChain, ChromaDB, Vector Search, HuggingFace Embeddings, Prompt Engineering

Security: Penetration Testing, Vulnerability Assessment, Wireshark, Nmap, OSINT, Secure Coding Practices

Languages: Java, JavaScript, TypeScript, Python

PROJECTS

RetailSenseAI – AI-Powered E-Commerce Platform *React.js · Node.js · JWT · MySQL · REST APIs | 2026*

- Developed a full-stack AI-powered e-commerce web application with secure user authentication, product management, shopping cart, checkout system, and admin dashboard using React.js and Node.js.
- Implemented **JWT-based** login/registration, dynamic product handling, image upload with database storage, and RESTful backend API integration — ensuring scalable and maintainable code architecture.
- Designed responsive frontend leveraging React.js component patterns, improving user experience and streamlining online retail operations with real-time data flow across 10+ API endpoints.

IT Helpdesk Bot with AI *Python · FastAPI · LangChain · ChromaDB · HuggingFace · SQLite · JavaScript | 2026*

- Built an AI-powered IT Helpdesk assistant using a **RAG pipeline** (LangChain + ChromaDB + HuggingFace embeddings) to resolve IT queries — automating ticket generation and eliminating manual triage.
- Developed FastAPI backend with REST APIs for chatbot communication, ticket statistics, and admin operations; integrated SQLite for persistent storage of tickets, chat history, and responses.
- Designed an interactive frontend dashboard (HTML/CSS/JS) with real-time chat, analytics, priority detection, status tracking, and an admin monitoring panel — demonstrating end-to-end full-stack delivery.

Inventory Management & Admin Dashboard (ISRBS) *React.js · TypeScript · Node.js · MySQL | 2026*

- Built a production-ready full-stack inventory platform with dynamic admin dashboard; implemented real-time CRUD operations across a structured MySQL schema managing product, media, and user data.
- Enforced end-to-end type safety with TypeScript across frontend and backend; REST API layer enabled seamless data flow with **zero breaking changes** across 10+ endpoints during iterative development.
- Engineered an image upload pipeline using Multer; applied systematic root-cause analysis to resolve critical API failures, reducing backend error rate to near-zero.

Marathon Registration System *React.js · Node.js · Express.js | 2026*

- Delivered a production-ready event registration platform with automated email confirmation (unique ID codes) and dynamic certificate generation — eliminating **100% of manual processing**.
- Built responsive, accessible UI integrated with REST APIs supporting high-concurrency registrations; implemented real-time form validation and secure data handling to ensure zero data loss under load.

PassMaster – Password Strength Analyser *Python · Streamlit · PostgreSQL | 2023*

- Developed a security tool using entropy-based analysis for password strength scoring with a secure generator and CSV export; stored and queried usage analytics across 1,000+ test entries in PostgreSQL.

PROFESSIONAL EXPERIENCE

Cybersecurity Intern · YHills Edutech Pvt. Ltd. *Jun 2025 – Aug 2025*

- Conducted vulnerability assessments and penetration testing on web applications; identified and documented 8+ critical attack vectors with structured remediation plans.
- Performed network traffic analysis using Wireshark and OSINT reconnaissance via Nmap and Sublist3r; produced security reports covering attack surface mapping and mitigation strategies.

Software Development Intern · Infosys Springboard *Jun 2024 – Jul 2024*

- Developed Java-based modules as part of a 4-member Agile team; delivered assigned features on schedule following industry code review and version control (Git) practices.

Software Development Intern · Infosys Springboard *Jun 2023 – Jul 2023*

- Completed structured software development curriculum; delivered coding assignments in Python and Java, building foundational skills in software engineering workflows.

EDUCATION

B.Tech – Computer Science Engineering *Expected May 2026*

Symbiosis University of Applied Sciences, Indore

CERTIFICATIONS

AWS Academy Cloud Foundations (2025) · IBM – AI Fundamentals · YHills – Cybersecurity (2025) · Forage – GenAI Job Simulation (2024) · NPTEL – Design, Technology & Innovation · Infosys Springboard – Python & Java (2023–24)
